

Federal student aid at your fingertips

Introducing a revamped myStudentAid mobile app

The enhanced myStudentAid mobile app boasts new personalized features for students, parents, and borrowers.

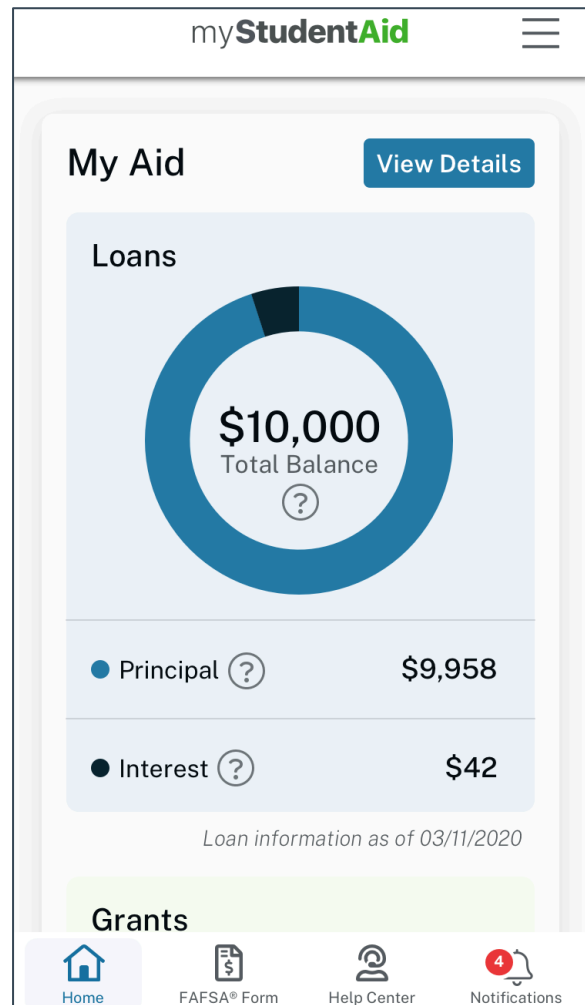

In 2018, FSA launched the myStudentAid mobile app and, for the first time, a mobile responsive, role-based Free Application for Federal Student Aid (FAFSA®) form that customers could access by using the app or their mobile browser. Since then, there have been more than 5 million FAFSA® submissions via a mobile device. In December 2020, FSA released a significant upgrade to the myStudentAid mobile app to expand the app's look, feel, and functionality.

myStudentAid Mobile App

The myStudentAid mobile app will be upgraded to reflect the look and feel of StudentAid.gov, and will also add several personalized features and improved functionality.

Before now, completing the FAFSA® form was the primary in-app experience available to users. With the upgraded app, users will be able to:

- create an account;
- view and update their account settings;
- access a personalized dashboard that summarizes their aid, highlights upcoming loan payments, and provides relevant content and checklists;
- view their detailed loan and grant information, loan servicer information, and details such as remaining Direct Loan and Pell Grant eligibility, qualifying payments toward public service loan forgiveness, and more with the new My Aid Summary feature;
- get important notifications and account updates, such as recertifying an income-driven repayment (IDR) plan within the Notification Center; and
- continue to receive alerts (push notifications) directly on their phone.

A new look and feel

These images provide a look at the payment history and role-based FAFSA® features in the revamped myStudentAid mobile app.
